WEEKLY USA GRAIN AND PROTEIN REPORT March 23, 2024

USA wheat prices were stronger this week, moving up by USD 9 to 10 m/t. Corn prices did very little for the week while soybeans had a down day on Friday dropping about USD 7 m/t and ended lower on the week by about USD 3 m/t. Soymeal was also weak on Friday but finished the week up by about USD 4 m/t.

US wheat prices were higher due to the action of the EU in approving an import tariff on Russian grains. The new EU tariff pushed European wheat prices up by about USD 8 m/t and had the same effect on US wheat prices. If Russian wheat is priced out of the EU market due to the new tariffs, the domestic demand for EU wheat will increase which could mean reduced EU wheat exports and the possibility of increased US wheat exports.

There was not much in the corn market to affect prices this week although lowered estimates for the Argentina corn crop was bullish but didn't seem to affect prices. Corn still looks to be a little bearish but could move to bullish depending on the Brazil crop estimates for the later corn crop.

While soybeans were lower there didn't seem to be much reason for the weakness. Some trade reports suggested that the weakness in soybeans is due to the expectation of higher levels in next week's Grain Stocks and Planting Intentions report.

Estimated Bulk Grain Freight in USD per m/t, basis heavy grains.

SECTION 2 --- FISHMEAL COMMENTS AND PRICES: PERUVIAN "INDICATION" FISHMEAL PRICES:

Little or no catch in the Southern fishing area of Peru. The total now is only 77 m/t against the 251,000 m/t quota. The fishing fleet is now reported to be on hold until after Easter.

Reports say that the current IMARPE research cruise is showing good biomass levels but very high levels of juvenile anchovy.

Fishmeal prices for the next season seem to have weakened a little. There is really very little activity in buying/selling the next season, so prices seem to be just drifting a little with no good reason for any lower prices.

Trade reports continue to be full of comments on the El Nino situation --- mainly because that is about all there is to talk about these days.

Reports are also speculating on the next North Central quota with estimate in a very wide range from 1.5 million m/t to 3.0 mm/t. At this moment it is all just guessing with no facts to work on except the past quotas over a bunch of years. And, the trade reports lean toward early April as the start of the new season – another guess.

European fishmeal prices – FOB North German port.

Type	Protein %	Price per m/t USD
