WEEKLY FEED GRAIN AND PROTEIN REPORT May 05, 2019

SECTION 1: US FEED GRAINS and VEGETABLE AND ANIMAL PROTEIN

Corn futures prices were up about USD 4 m/t on the week while soybean prices continued lower – dropping by almost USD 9 m/t – soymeal to was down by about USD 6 m/t. Winter wheat prices also slipped a little lower – down by about USD 2 m/t with spring wheat almost unchanged.

Much of the strength in corn priced is related to the weather in the US corn belt – too much rain and flooding in some areas and almost drought conditions in others. The weather for the coming week is for more rain for much of the corn belt --- could see more delayed planting on corn.

The big speculators in corn futures are still very short corn, although they did reduce their short a little this week --- but it still looks like they are expecting lower corn prices.

Soybeans/soymeal just continue to move lower as supplies and crops of soybeans everywhere are very good and business to major buyer – think China – is not as good as had been hoped. There seems to be nothing new to report on the US/China trade position although Donald Trump is "very hopeful" that a solution will be found.

As with corn, the major futures speculators are very short soybeans and added more shorts this week.

Winter wheat prices just continued its slow slide lower as supplies in the world seem to be overwhelming demand. Most new grain reports have wheat crops in very good condition in almost every wheat exporting country. No one is currently forecasting higher prices.

WEEKLY GRAIN AND PROTEIN MEAL REPORT Copyright © 2019 Wayne S. Bacon A GAFTA Member Corporation

A division of Hammersmith Marketing Ltd.

Corn by-product prices were lower this week as improved logistics continues to make export shipments easier and the basis to export ports lower. The US Grains Council report this week was saying that US rail rates have dropped this week and that "river/transportation logistics" have improved.

It is expected that the increase in corn prices this week should stop a drift lower in by-product prices and may push prices a little higher next week.

The USDA issued their latest grain crushing report this week and it shows that DDGS production for March was at 1.86 million m/t, up about 10% from February but down about 4% from last year in March.

Corn gluten feed production for March was at just over 300,000 m/t and corn gluten meal at 89,000 m/t both are up from February but down a little from March 2018.

<u>USA exports of corn by-products – 2 months to February 2019 – major destinations and selected countries – in m/t</u>

USA Poultry Meal, feed grade	USD 480/500 m/t CNF Asia
USA Poultry Meal, pet food grade	USD 720/740 m/t CNF Asia

No change in export meat and bone meal protein prices this week. The Jacobsen report notes that holidays in China and the start of Ramadan today have combined to limit buyers in the market.

However, both US feathermeal and poultry meal export prices did slip lower due to very large supplies available from the US.

The US domestic prices for animal proteins are also having trouble showing any strength --- supply is very good but demand is slack. Mixed animal MBM is said to be very weak with Jacobsen mentioning ex-works prices as low as USD 175 ton. With prices so low there could be a swing of buyers back to MBM.

SECTION 2 --- FISHMEAL COMMENTS AND PRICES: PERUVIAN

Fishing in northern Peru up to May 02 reached 197,000 m/t which should produce about 45,000 m/t of fishmeal and 5,800 m/t of fishoil. On the average about 400 vessels were out fishing. The daily average catch is at about 45,000 m/t.

There have been a couple of mini-bans announced due to higher juvenile fish levels but, all in all, things seem to be going very well.

No significant change in prices this week as both buyers and sellers have been waiting to see how the fishing progresses. However, Peru prices are expected to move lower soon. New sales were also limited for the same reason, but buyers should be in the market shortly as fishing continues --especially if fishing remains quite good. Buyers are expected to be trying to buy at much lower price levels – there was some talk that prices for better grades could drop by USD 100 m/t as supply looks to be growing.

European fishmeal prices – FOB North German port.

Type	Protein %	Price per m/t USD
