

ATYFEN

ATYFEN SARL FISH MEAL AND FISH OIL

INTRODUCTION

Mauritania is located in West Africa; it has more than 700 km on the Atlantic coast. The Mauritanian coast, yet rich in fish, is recognized as a diversified and highly productive region. This productivity is favored mainly by the upwelling that pulls up waters of the deep ocean areas rich in nutrients. This upwelling explains the wealth of the Mauritanian continental waters in exploitable marine resources.

KEY NUMBERS

The absence of all forms of pollution throughout the Mauritanian coast, responsible management of resources and finally the new fishing strategy of the Mauritanian government, make Mauritania, now a popular destination for all fishing farms.

KEY NUMBERS

Among the fisheries identified by the new fishing strategy of the Mauritanian government, the pelagic fishery is the most important. The stock available is more than 2 000 000 tons / year not counting stock on anchovy, which is extremely important (A current experimental study is in the agenda to identify the anchovy stock).

ABOUT US

In this promising environment, was born in 2012 in northern Mauritania Nouadhibou, ATLANTIC YUFEN-ATYFEN Sarl. First, this evocative name ATLANTIC YUFEN will remind our Chinese friends and brothers that in Atlantic we could also, with the beautiful sardines, process flour and fish oil ...!

ABOUT US

During the years 2013, 2014 and 2015 we worked with artisanal canoes with an annual production from 25 000 to 30 000 tons of raw material (90 % sardinella aurita), all the Canoes were working at night and providing daily catch of extreme quality.

The Chinese government has granted health approval to ATLANTIC Yufen. So, we open our doors to the Chinese market.

RAW MATERIAL

SARDINELLA MADERENSIS

SARDINELLA AURITA

CERTIFICATIONS AND LICENSES

- ISO 22000
- HACCP
- EU/EEC
- AQSIQ & MOA
- IFFO PRODUCER MEMBER

66%MIN FISH MEAL: GUARANTEED SPECIFICATIONS

Protein	66% Min
Fat	10% Max
Moisture	10% Max
Salt + Sand	5% Max
Sand Alone	2% Max
Ashes	18% Max
TVN	120Mg/100gr Max
FFA	10% Max
Histamine	500 ppm Max
Antioxidants	150 ppm Min

QUALITY CONTROL

- In-house Laboratory with constant analysis take before during and after stages of production.
- European Independent Surveyors used to confirm Quality Analysis Parameters.

STATE OF THE ART PRODUCTION PLANT

FISHING VESSEL FLEET

- All Fishing Vessels are equipped with RSW refrigeration systems
- 1 Owned Vessel: SVANAVAG
- 2 Chartered Vessels: DENIZER AND NECATI REISS 2
- 2 more partner-owned vessels to begin Fishing in November (MAHMUT KURSUN & ERGUN BASARAN)

SVANAVAG

DENIZER

NECATI REISS 2

MAHMUT KURSUN

ERGUN BASARAN

ATYFEN PRODUCTION PLANT & OFFICE LOCATION

ZONE INDUSTRIELLE BOUNTYA - NOUADHIBOU, MAURITANIA

PROJECT UNDERCONSTRUCTION

We are currently building a fish freezing unit.

Our capacity is : 300 T frozen product / day.

PROJECT UNDERCONSTRUCTION

Storage capacity: 2000 Tons.

Start date of operations: February 1, 2017.

MAIN FROZEN PRODUCTS

Commercial Name : RIBBONFISH “ Tallar ”

Scientific Name: *Trichiurus lepturus*

OPEN INVITATION

ATLANTIC YUFEN- ATYFEN Sarl took this important meeting in this beautiful and formidable China region to extend an invitation to all professionals wishing to discover the wealth of the Mauritanian continental waters in exploitable marine resources.

Visit us at Nouadhibou, to exchange and share our common experiences in the fields of fisheries in general, or in the Fish meal and fish oil industry, in particular.

CONCLUSION

We will be honored and pleased to receive you in Mauritania. During these days in Guangzhou, we will have a stand in which we will be happy to introduce our company and Mauritania.

Thank you very much
